americans are increasingly alarmed over our nation s
educational deficiencies though anxieties about schooling are
unending especially with public institutions these problems are
more complex than institutional failure expenditures for
education have exploded and far exceed inflation and the rising
costs of health care but academic achievement remains flat many
students are unable to graduate from high school let alone
obtain a college degree and if they do make it to college they
are often forced into remedial courses why despite this fiscal
extravagance are educational disappointments so widespread in
bad students not bad schools robert weissberg argues that the
answer is something everybody knows to be true but is afraid to
say in public america s educational woes too often reflect the
demographic mix of students schools today are filled with
millions of youngsters too many of whom struggle with the
english language or simply have mediocre intellectual ability
their lackluster performances are probably impervious to the
current reform prescriptions regardless of the remedy s
ideological derivation making matters worse retention of
students in school is embraced as a philosophy even if it
impedes the learning of other students weissberg argues that
most of america s educational woes would vanish if indifferent
troublesome students were permitted to leave when they had
absorbed as much as they could learn they would quickly be
replaced by learning hungry students including many new
immigrants from other countries american education survives
since we import highly intelligent technically skillful
foreigners just as we import oil but this may not last forever
when educational establishments get serious about world class
mathematics and science and permit serious students to learn
problems will dissolve rewarding the smartest not spending
fortunes in a futile quest to uplift the bottom should become
official policy this book is a bracing reminder of the risks of

political manipulation of education and argues that the measure of policy should be academic achievement
